

Consistency of PEOs with Mission of the Department

After a long discussion with the faculty members the following relationship is established between Mission of the department and Program Educational Objectives.

PEO Statements	M1	M2	M3	M4
PEO1	3	2	3	3
PEO2	3	3	3	3
PEO3	3	3	2	3
PEO4	2	2	3	3

M1, M2, M3, M4 are Mission statements and PEO1, PEO2, PEO3, PEO4 are Program Educational Objective statements.

Correlations levels are 1: Slight (low) 2: Moderate (Medium) 3: Substantial (High)

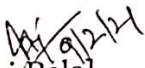

Justification

PEOs	M1	M2	M3	M4	Justification
PEO1	3	2	3	3	(Mission 1) strongly supports PEO1 to drive a strong foundation in Computer Engineering to succeed in industry or higher education. (Mission 2) moderately support to achieve PEO1, as objective is to produce computer engineers by high quality education. With strong social and environmental issues to succeed in industry or higher education Mission3 strongly helps to achieve PEO1 (Mission 4) highly supports to achieve PEO1 for industry ready by technical and professionals skills
PEO2	3	3	3	3	(Mission 1) strongly support to achieve PEO2, as objective is to be able to solve real world problems using strong theoretical and practical knowledge in Computer Engineering. (Mission 2) strongly supports PEO2, as professional career can only be achieved by providing strong learning environment Strong social and environmental values (Mission 3) will help in achieving success in solving real world problems. (PEO 2) To make students ready for industry through technical and professional skills (Mission 4) can be achieved with strong support of core knowledge of Computer Engineering (PEO 2)

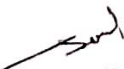

PEO3	3	3	2	3	Mission 1 Strongly support as theoretical and practical knowledge will help in achieving success as career in Computer Engineering or entrepreneurship. Strongly support as by providing strong learning environment (Mission 2) can lead to successful career in Computer Engineering. Moderate as awareness of social and environmental issues for successful career in Computer Engineering. Strongly support to develop technical and professional skills (Mission 4) to succeed as career in computer engineering
PEO4	2	2	3	3	Moderate support of Technical and practical knowledge (Mission 1) helps in excelling in professional skills (PEO 4) PEO 4 can be achieved through moderately by providing strong learning environment. Strong bond between Mission 3 and PEO 4 helps in excelling in professional career. To prepare students for industry ready by technical and professional (Mission 4) is necessary to achieve professional growth.
